01

INTRODUCTION

My name is Fivos Avgerinos and I am a designer with a passion for interface design, typography, minimal aesthetics and front-end development.

I hold an Honours BSc in Business Management from the University of Essex and an MSc in Logistics and Supply Chain Management from the University of Westminster.

During my postgraduate studies, I experimented with UI design and taught myself how to code. My passion for design has been following me for several years and I have been working on freelance projects since 2010.

It was immediately after completing my master's dissertation that I joined Longaccess as the only designer and worked closely with the developers for two years in conceptualizing, designing and coding the company's three products.

I am equally passionate both about shaping meaningful and clean interfaces with a focus on content and an intuitive user experience, as well as turning my work into a functional product using the latest, future-proof front-end development tools available while remaining open to collaborating with developers.

02

PROJECTS & EMPLOYMENT

Freelance Design

2010-present · afivos.com

Initially freelanced as a graphic designer. Having shifted to the web I have worked on projects covering brand identity, leaflets, lettering and video editing among others, ultimately shifting to interface design and front-end development.

UI / UX Design

Longaccess, 2013-2015 · longaccess.com

Being the only designer in a startup focusing on cloud storage, I was in charge of conceptualizing, designing and coding our native apps, as well as our three products' interfaces: Longaccess; Deepfreeze.io; BigStash. I was also in charge of all graphic design related material.

Design, Front-End Development

Millhouse, 2016-2017 · millhouse.gr

Created an online presence for Millhouse cereals and developed a design system for the whole project. Turned mockups into functional static pages that later turned into a fully dynamic platform, working alongside a backend developer using SQL & PHP.

Design, Front-End Development

Babography, 2014 · babography.com

Led design and offered consulting. Redesigned and coded the landing page giving it a playful look that communicated the startup's message clearly in order to appeal to parents looking to store the early memories of their children.

03

EDUCATION

MA Design: Expanded Practice

Goldsmiths University of London

October 2017-December 2018 (Pending)

MSc Logistics and Supply Chain Management

University of Westminster, London

October 2012-June 2013

BSc Business Management

University of Essex, Colchester

September 2009-June 2012

04
